Election/Restrictions

1. Applicant's election with traverse of specie A in the reply filed on 1/7/2005 is acknowledged. The traversal is on the ground(s) that both species represent a common invention and that it would be expedient to examine both species at once. This is not found persuasive because no proof has been provided regarding the allegation that the species represent a common invention, and expediency is not determined by applicant.

The requirement is still deemed proper and is therefore made FINAL.

Claims 19 and 29 have been withdrawn and claim 5 has been rejoined because the generic claim has been found allowable over the prior art.

Drawings

2. The drawings are clearly informal as evidenced by the rough lines and poor picture copying. Formal drawings are now required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11-18, 20-28 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Carlucci et al. '160.

Carlucci et al. shows a housing 12 having a recess; coupling/intake assembly 20, 50, 35 and associated structure; heater assembly having a heater 40, heat sink/chamber 24; the heating chamber is non-linear as seen in Figure 2; first portion

also seen in Figure 2; actuator 28; exhaust valve 16; upper portion above 20, lower portion below 20; shapes seen in Figure 1a; as the top pivots, the fastener is movable; can 14; and stem 16.

Allowable Subject Matter

5. Claims 1-10 are allowed.

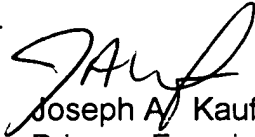

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Michaels et al. '349 and Carlucci et al. '966 show other heating devices.
